Public Disclosure Notice

The following public information is provided by the Commission on Accreditation in Physical Therapy Education (CAPTE) regarding the

Department of Physical Therapy
College of St Scholastica
Duluth, MN

CAPTE is a specialized accrediting agency that accredits physical therapy educational programs across the United States. The information presented below is in accord with CAPTE’s disclosure policy; staff of the Commission cannot comment further on questions specifically related to the physical therapist education program at College of St Scholastica.

On October 29, 2019 the Commission on Accreditation in Physical Therapy Education made the following decision regarding the physical therapist education program at College of St Scholastica:

Continue Probationary Accreditation based on a Good Cause Effort

What is the program’s Accreditation Status?
Probationary Accreditation

Probationary Accreditation is an accredited status; students who graduate from the program while it is on probation are considered to be graduates of an accredited program. Probationary accreditation indicates that there are conditions at the program that place the program’s accreditation in jeopardy and provides notice to the program and the public that if the program does not address the identified conditions, accreditation will be withdrawn.

Why is the program on probation?
CAPTE’s decision to continue Probationary Accreditation is based on the program’s inability to demonstrate compliance with the Standards and Required Elements, such that the program’s ability to provide an appropriate educational experience is in question. While CAPTE recognizes the program as demonstrating a good cause effort to come into compliance, the program was judged to be out of compliance with the following required element(s): 8A.

What options does the program have to respond?
The decision to place a program on probation may not be appealed. The program has been asked to file a Compliance Report due March 1, 2020 that addresses the issues identified by the Commission. The Commission will review the Compliance Report at its April 24-28, 2020 meeting. Upon review of the report, the Commission may
• remove probation if the report satisfies the Commission’s concerns, or
• continue probation if the report satisfies some but not all of the Commission’s concerns, or
• withdraw accreditation if the report does not satisfy the Commission’s concerns and the Commission believes that the program is not making a good cause effort to do so.

Re: Response to Accompany Public Disclosure Notice

Dear Commission,

The physical therapist education program at the College of Saint Scholastica acknowledges receipt of the recent Summary of Action regarding our probationary accreditation status. We recognize that we remain out of compliance on element 8A at this time. As noted in our response to the SOA of April 30, 2019, we have an additional faculty member under contract who will join us in January 2020 and are optimistic that this will resolve concerns related to element 8A. We appreciate the Commission’s diligence in evaluating our progress with respect to our probationary status and look forward to submitting our next compliance report in March 2020.

Sincerely,

John D. Borstad, PT, PhD
Professor and Chair
Department of Physical Therapy
